

# Koshi batten detail

## Profile: Square 60x60

Weight: 0.754kg/m

Batten thickness: 1.2mm

End cap thickness: 4.0mm

End cap: Coloured ABS plastic

### Endcap detail

	Install	Never strike extrusion directly with a hammer or rubber mallet. Use a pine plank between the tool and the extrusion to avoid surface damage or denting.				Approval	Check	Drawing	Design	 <div style="display: flex; justify-content: space-between;"> <div>Melbourne Showroom 2 Ginibi Drive Altona North VIC 3025</div> <div>T +613 9398 8128 info@covet.com.au www.covet.com.au</div> </div>		
	End Caps	Screw fix or apply exterior grade adhesive (Sikaflex) to secure cap to batten.										

## Koshi Batten Installation Guide

- Aluminium can be damaged if mishandled. Never strike directly with a hammer or rubber mallet. Use a pine plank between the striking rubber mallet and the extrusion to avoid surface damage or denting.
- Cut aluminium with a drop saw using an aluminium blade.
- Always cap ends of extrusions with supplied end caps or a flashing to avoid moisture ingress.
- Metal end caps (painted) must be screwed to the extrusion.
- All end caps can only be applied to straight 90 degree cuts. They cannot be applied to angle end cuts.
- Ensure appropriate screws are used to suit the substrate you are fastening to. It is important to use stainless steel or bi-metal screws for all metal surfaces impacted when fastening (i.e. furring channels, top hats, steel frames). This will prevent galvanic reaction between the screw/substrate and aluminium extrusion.
- Fasten at maximum 1 metre spans. Please contact Covet for further information.
